

PRELIMINARY AMENDMENT
U.S. Application Not Yet Filed

REMARKS

An error in the title is corrected.

With respect to the change page 61, specifically at line 13, changing "nitrogen" to --hydrogen--, Process 2 of Example 1 is an embodiment of Process 6 at page 28. The corresponding starting compound is compound (V) represented in Scheme 3 wherein M¹ is a benzyl group; X¹ is N; X² and X⁴ are C-CH₃; X³ is CH; and R is a 3-fluoro-4-methylphenyl group. The corresponding product is compound (III) represented in Scheme 3 wherein X¹, X², X³, X⁴ and R have the same meanings. Therefore, the need for the change would be apparent to one of ordinary skill in the art.
